Appendix A: MSIS State Summary Data Cubes

Notes:

Introduction

What is MSIS?

The Medicaid program began in 1965 with the passage of Title XIX of the Social Security Act. More than thirty years later, Medicaid still provides low-income and disabled Americans of all ages with access to medical and health-related services. Additionally, under the State Child Health Insurance provisions – SCHIP (Title XXI) of the Social Security Act, as included in the Balanced Budget Act of 1997, coverage to children otherwise not eligible for Medicaid is administered in some States as an expansion to Medicaid.

Medicaid is a federal-state partnership. The federal government partially funds the program and establishes mandatory and optional program characteristics. The States provide the remaining program funding, choose which program options that they wish to implement, and directly administer the program in their State.

Under the Balanced Budget Act of 1997, as of 1/1/99, it is mandatory that States report Medicaid data through the Medicaid Statistical Information System (MSIS) system. This system requires the States to submit raw eligibility and claims data to the Centers for Medicare and Medicaid Services (CMS). MSIS data is used by CMS to produce Medicaid program characteristics and utilization information. MSIS data is made available to States and other federal agencies in order to gain greater insight into the Medicaid program.

The MSIS State Summary data mart consists of enrollment, demographic, and claim information for each Medicaid fiscal year. The information is stored in a data cube and is viewed using Cognos PowerPlay Web.

Understanding Data Cubes

A **data cube** is a method of displaying dimensions and measures. Two cubes are provided from the MSIS State Summary data mart for each Medicaid fiscal year. One cube contains measures and dimensions relevant to monthly eligibility statistics. The other cube provides quarterly and annual measures and dimensions for both eligibility and claim information.

A **measure** is a count or summarization of Medicaid information. Some of the measures in the MSIS data cubes are Total Months Eligible Count and Total Medicaid Paid Amount.

A **dimension** is a description or characteristic of the measure. Characteristics of Total Months Eligible Count include Maintenance Assistance Status (MAS) and Basis of Eligibility (BOE). Characteristics of Total Medicaid Paid Amount include Service Type and Program Type.

Special Note

This documentation describes the PowerPlay interface using Microsoft Internet Explorer version 5.5 or higher. See the on-line Help  for assistance with the features and functions of the interface when using an older version of IE or another browser application.

State Summary Measures

The MSIS data is summarized into eligibility and claim related measures. The measures in the State Summary quarterly cube are:

- Encounter Total Claims Count
- Inpatient Discharge Total Count
- Total Claims Count
- Total Days of Care Count
- Total Medicaid Paid Amount
- Unique Beneficiaries Count
- Unique Eligibles Count
- Unique Encounter Beneficiaries Count
- Unique Enrollees Count*

The measures in the State Summary monthly cube are:

- Eligible Full Period Count
- Total Months Eligible Count
- Unique Eligibles Count
- Unique Enrollees Count*~

A description of each measure is listed in *Appendix A: MSIS State Summary Data Cubes*.

*NOTE: The Unique Enrollees Counts are only calculated when Plan Type is one of the dimensions. When Plan Type is not a selected dimension, these values are zero.

~NOTE: The Unique Enrollees Count is not included in the monthly cube for FY 1999.

When you open PowerPlay Web, the application displays the default view of the report. It shows the states listed down the left as the rows. The year and measures (Unique Eligibles Count, Unique Beneficiaries Count, and Total Medicaid Paid Amount) are listed at the top as the columns. You can now customize the display by adding dimensions, changing measures shown, filtering on dimensions, and changing the format.

Use the dimension folder panel to add up to 4 dimensions (plus state and period) to your report.

Use the dimension line to add dimensions and filter report data on dimensions.

Row drop area

The current cube view displays in this panel.

Changing Measures

The application displays the Unique Eligibles Count, Unique Beneficiaries Count, and Total Medicaid Paid Amount measures by default. You can choose to view any combination of measures. You must display at least one measure.

Follow these steps to display only one measure.

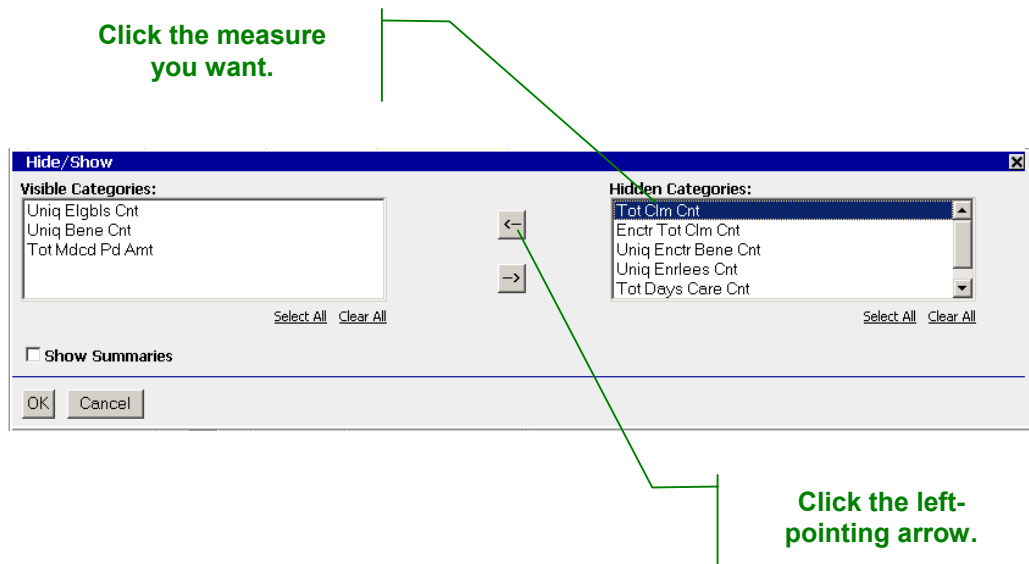

1. Right click the heading of any measure. A menu displays.
2. Select **Hide/Show....** The Hide/Show window displays.

Right click a measure heading.

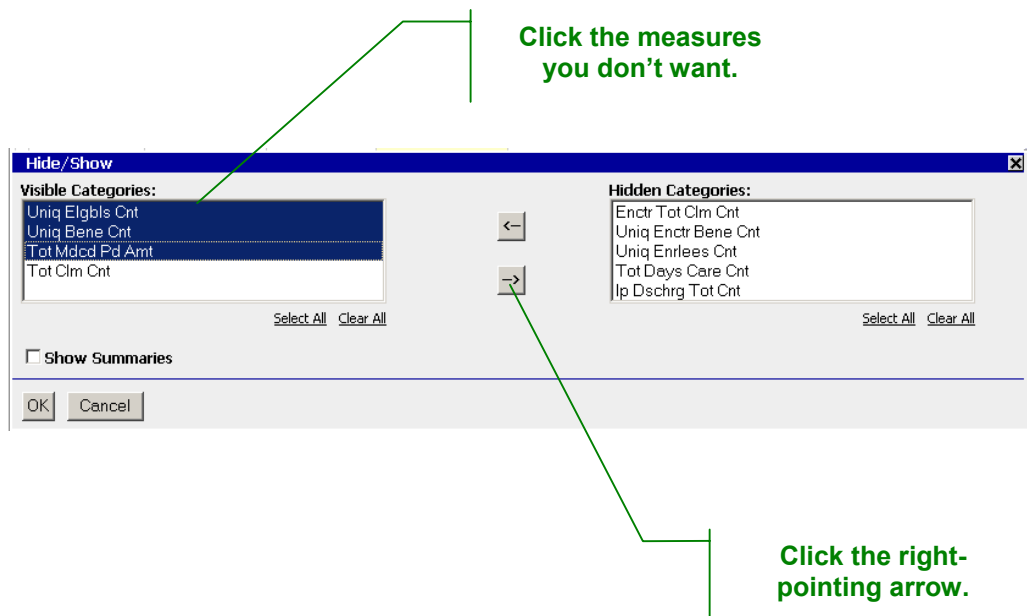

Click Hide/Show.

Follow these steps to remove a measure from the display.

1. In the display panel, right click the measure you want to remove. A menu of available functions displays.
2. Click **Hide Selection**.

Right click the measure in the display panel.

Click Hide Selection.

The screenshot displays the Cognos PowerPlay Web Explorer interface. The main display panel shows a table of data for the 2001 Medicaid Quarterly State Summary. The table is organized into two main sections: 2001 ANNUAL and 2001 Q1. The 2001 ANNUAL section includes columns for Uniq Elgbls Cnt, Uniq Bene Cnt, Tot Clm Cnt, Tot Mdcd Pd Amt, Enctr Tot Clm Cnt, Uniq Enctr Bene Cnt, Uniq Enrless Cnt, Tot Days Carr, and Id Dschrg. The 2001 Q1 section includes columns for Uniq Elgbls Cnt, Uniq Bene Cnt, Tot Clm Cnt, and Tot Mdcd Pd Amt. A right-click context menu is open over the 'Uniq Enrless Cnt' measure in the 2001 ANNUAL section, with the 'Hide Selection' option highlighted. The left pane shows the folder structure, and the top pane shows the cube structure.

Removing Summary Rows and Columns

PowerPlay includes summary rows and columns in the display. Because the values in the State Summary cubes have been pre-aggregated, these summaries contain 0 or NA. Follow these steps for each level (dimension or measures) to remove the summary rows and columns from the display.

1. In the display panel, right click the row or column you want to remove. A menu of available functions displays.
2. Click **Hide/Show...**. The Hide/Show window displays.

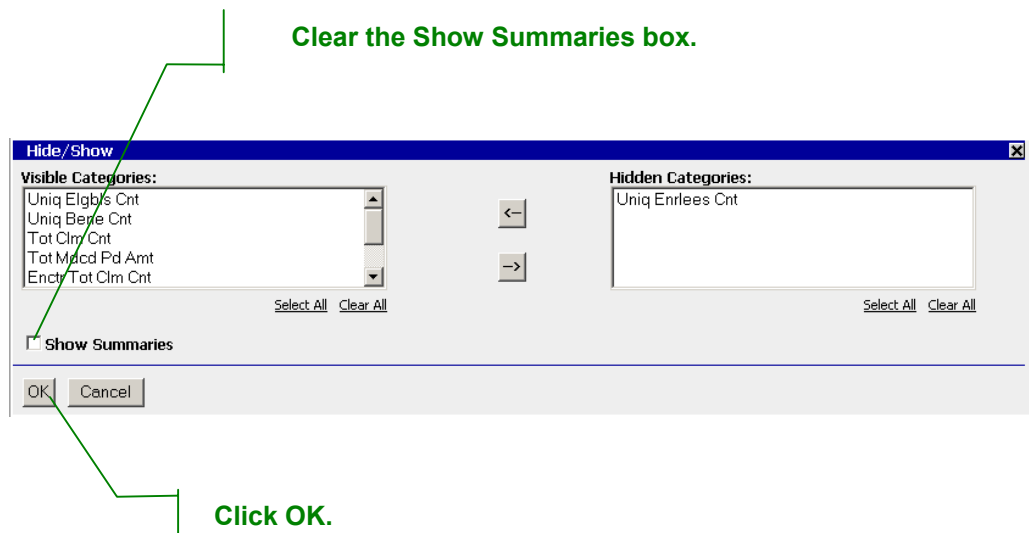

Right click the row or column in the display panel.

Click Hide/Show...

Calculating Measures

You can create new measures that are derived from the displayed values. For example, follow these steps to show the average paid amount per claim.

1. Right click the heading of any measure. A menu displays.
2. Select **Insert Calculation...**. The Calculations window displays.

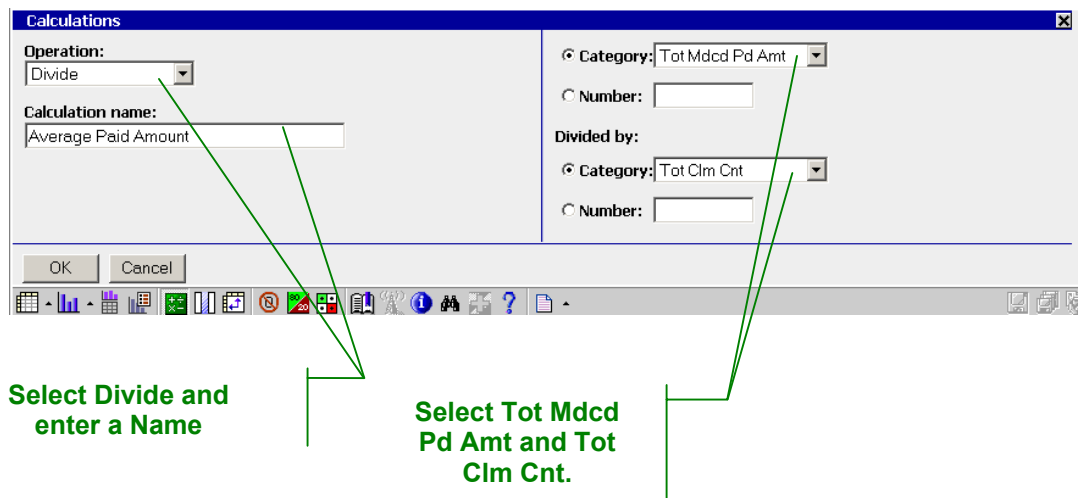

Right click a
measure heading.

Select Insert
Calculation.

3. From the Operation drop-down list, select **Divide**.
4. Type in a Calculation Name. This name will be used as the column heading.
5. From the first Category drop-down list, select **Tot Mdcd Pd Amt**.
6. From the second Category drop-down list (after Divided by), select **Tot Clm Cnt**.

7. When the calculation is set up the way you wish, click **OK**.

8. The display updates based on your selection. Note that calculated measures are in italics.

The new calculated row displays at the bottom of the report window.

State Summary Dimensions

Understanding Dimension Values

The State Summary cubes structure information so that you can easily explore the interactions between different characteristics of the Medicaid program. The dimensions add levels of detail to this data.

The dimensions in the State Summary data cubes contain established code values and reference information. The dimensions in the quarterly data cubes are:

- State
- Period (Medicaid fiscal year and quarter)
- Adjustment Indicator
- Age Group
- Basis of Eligibility
- Claim Type
- Dual Eligible
- Maintenance Assistance Status
- Plan Type
- Program Type
- Race/Ethnicity
- SCHIP
- Service Category
- Service Type
- Sex

The dimensions in the monthly data cubes are:

- State
- Calendar Year – Calendar Month (Medicaid fiscal year and month)
- Age Group
- Basis of Eligibility
- Dual Eligible (*beginning with FY2003 data*)
- Maintenance Assistance Status
- Plan Type
- Race/Ethnicity
- SCHIP
- Sex

A description of and the valid values for each dimension are listed in *Appendix A: MSIS State Summary Data Cubes*.

In addition to the valid code values, the dimensions have a value that is asterisks (**). The double-asterisk value is the top level of the dimension that has no detailed breakdown. This top level should always be selected when the dimension is not part of the display.

The only dimensions in the quarterly cube that do not have a top level are State and Period. The only dimensions in the monthly cube that do not have a top level are State and Year-Month.

The cubes have been created so that zeros are displayed in the cells when the dimension values have not been selected correctly.

Changing Dimensions

When viewing the State Summary cubes, you must always include the **State** and time dimensions. For the quarterly cubes, the time dimension is **Period** (Medicaid fiscal year and quarter). For the monthly cubes, the time is Medicaid fiscal year and month labeled as **Calendar Yr - Calendar Mo**. The default view of the cubes includes the State and time dimensions.

You can select up to four other dimensions in addition to the State and time.

To add a dimension to your display, follow these steps.

1. To include all dimension values, drag and drop the folder onto the row or column drop area of the display. A bold narrow line appears in spots where you can place the dimension.

Click the dimension folder.

Drag to the drop area where you want to display the dimension.

Drag to the drop area where you want the dimension displayed.

2. The display updates based on your selection. Notice that this method includes only the value displayed on the dimension line. In the example below, the value is ****DUAL ELIGIBLES**.

Only the value shown on the dimension line is displayed.

The screenshot shows the Cognos PowerPlay Web Explorer interface. The left pane displays a tree view of the data model, including dimensions like State, AgeGrp, Race, Sex, MAS, BOE, DualElgbl, SCHIP, PgmType, PlanType, SrvCtgr, SrvCType, ClnType, Adjustment Ind, and MEASURES. The main pane displays a table titled '2001 Medicaid Quarterly State Summary'. The table has columns for 'Uniq Elgbls Cnt as values' and five quarters: 2001 ANNUAL, 2001 Q1, 2001 Q2, 2001 Q3, and 2001 Q4. The rows are grouped by state (AK, AL, AR) and then by age groups (UNDER 1, 1-5, 6-12, 13-14, 15-18, 19-20, 21-44, 45-64, 65-74, 75-84, 85 AND OVER, UNKNOWN). The table shows the count of unique eligible individuals for each category. A green arrow points from the text 'Only the value shown on the dimension line is displayed.' to the '**DUAL ELIGIBLES' header in the table.

To add only one value from a dimension to your display, follow these steps.

1. Click the plus sign () next to the folder for the dimension you want to add to the report. All values within the dimension are displayed.

Click the plus sign
to list all values in
the dimension.

To remove a dimension from the display, follow these steps:

1. Click the level selector area for the dimension in the display panel that you want to remove. (The level selector area is the small box above the row labels and to the left of the column labels.) The level selector toolbar displays.

Click the level selector area for the dimension you want to remove.

The screenshot shows the Cognos PowerPlay Web Explorer interface. The main display area shows a table titled "2001 ANNUAL" with columns for various dimensions and measures. The left-hand display panel shows a tree view of dimensions: State, Period, AgeGrp, Race, Sex, MAS, BOE, DualElgbl, SCHIP, PgmType, PlanType, SrvctCtgr, SrvctType, ClnType, Adjustment Ind, and MEASURES. The table displays data for various states (AK, AL, AR) and age groups (UNDER 1, 1-5, 6-12, 13-14, 15-18, 19-20, 21-44, 45-64, 65-74, 75-84, 85 AND OVER, UNKNOWN). The table is filtered by "2001 ANNUAL" and "WAIVER".

- Click the arrow on the dimension line for the dimension that was just deleted. A list of dimension values displays.
- Select the top level (the double asterisk value) of the deleted dimension.

Click the arrow next to the dimension that was deleted.

Select the double asterisk value.

The screenshot displays the Cognos PowerPlay Web Explorer interface for the '2001 Medicaid Quarterly State Summary'. The left-hand pane shows a hierarchical tree of dimensions, including 'State', 'Period', 'AgeGrp', 'Race', 'Sex', 'MAS', 'BOE', 'DualElgbl', 'SCHIP', 'PgmType', 'PlanType', 'SrvctCgry', 'SrvctType', 'ClnType', 'Adjustment Ind', and 'MEASURES'. The main area shows a table with columns for various categories and a dropdown menu for 'AgeGrp' showing options: **AGE GROUPS, UNDER 1, 1-5, 6-12, and 13-14. The table data shows counts for various states (AK, AL, AR, AZ, CA, CO, CT, DC, DE, FL, GA, IA, ID, IL, IN, KS, KY, LA, MA, MD, ME, MI, MN, MO, MS, MT, NC, ND, NE) across different categories like **DUAL ELIGIBLES, NOT A DUAL, SLMB ONLY, SLMB/MEDICAID, QDWI, QI (1), QI (2), OTHER DUALS, DUAL CATEGORY UNKNOWN, UNKNOWN, and **DUAL ELIGIBLES. The table is titled '2001 ANNUAL' and '2001 Q1'.

Zeros in all of the cells mean that the dimension levels are not set correctly. To set a dimension to the top level, follow these steps. Do this for each dimension that needs to be reset.

1. Click the arrow on the dimension line. A list of dimension values displays.
2. Select the top level (the double asterisk value).

Click the arrow for the dimension that needs to be reset.

Select the double asterisk value.

The screenshot shows the Cognos PowerPlay Web Explorer interface. The left-hand tree view displays a hierarchy of dimensions: State, Period, AgeGrp, Race, Sex, MAS, BOE, DualElgbl, SCHIP, PgmType, PlanType, SrvCtgry, SrvCType, ClnType, Adjustment Ind, and MEASURES. The main area displays a table titled '2001 Medicaid Quarterly State Summary'. The table has columns for 'Uniq Elgbls Cnt as values' and quarterly data for 2001 (ANNUAL, Q1, Q2, Q3, Q4). The 'Sex' dimension is expanded, showing a dropdown menu with options: **SEXES, FEMALE, MALE, and UNKNOWN. The **SEXES option is highlighted. The browser address bar shows 'http://63.240.208.150/cognos/cgi-bin/c'.

“NA” in some or all of the cells means that measures have been placed in both the row and column areas. To correct this problem, follow these steps.

1. Delete all the measures from either the row or column area.

Delete all the measures from either the row or column area.

When zeros are displayed in the cells for all lower level dimension values, more than four dimensions (in addition to State and time period) have been selected. Delete one or more dimensions until four or fewer (in addition to the State and time period) are selected. For each dimension to be deleted, follow these steps.

1. Click the level selector area for the dimension that you want removed from the display panel.

2. Click the delete button  on the level selector toolbar.

Click the level selector area.

Click X.

3. After deleting each dimension, click the arrow on the dimension line to list the dimension values.
4. Select the top level (the double asterisk value) of the deleted dimension.

Click the arrow next to the dimension that was deleted.

Select the double asterisk value.

The screenshot shows the Cognos PowerPlay Web Explorer interface for the 2001 Medicaid Quarterly State Summary. The left-hand tree view lists various dimensions: State, Period, AgeGrp, Race, Sex, MAS, BOE, DualElgbl, SCHIP, PgmType, PlanType, SrvcCtgr, SrvcType, ClnType, Adjustment Ind, and MEASURES. The main area displays a table with columns for 2001 ANNUAL, 2001 Q1, 2001 Q2, 2001 Q3, and 2001 Q4. The table is filtered by AK, ADULTS, 19-20, and **RACE ETHNICITIES. A dropdown menu is open for the MAS dimension, showing options like **MAS, RECEIVING CASH, MEDICALLY NEEDY, POVERTY RELATED, OTHER, UNKNOWN, **SEXES, FEMALE, and MALE. The **MAS option is selected.

4. Format the display to show the dimensions and measures you want. Click **Get Data** to retrieve the actual values.

Click Get Data.

The screenshot displays the Cognos PowerPlay Web Explorer interface for the '2001 Medicaid Quarterly State Summary'. The left sidebar shows a tree view of dimensions: State, Period, AgeGrp, Race, Sex, MAS, BOE, DualElgbl, SCHIP, PgmType, PlanType, SrvcCtgr, SrvcType, ClmType, Adjustment Ind, and MEASURES. The main area shows a table with columns for 'Uniq Elgbls Cnt as values' and various measures for 2001 ANNUAL, 2001 Q1, 2001 Q2, 2001 Q3, and 2001 Q4. The measures include Uniq Bene Cnt, Tot Clm Cnt, and Tot Mdcd Pd Amt. The table is currently empty, and a 'Get Data' button is visible in the center of the table area.
